

Editorial

A new year begins, and with it, we reach Vol. 26 of **Turismo: Visão e Ação**. It marks 26 uninterrupted years of work, contributing to the construction and sharing of knowledge in the field of tourism and related areas. This achievement fills us with pride, but at the same time, it imposes the challenge of remaining steadfast, constantly seeking improvement and innovation, especially after a special 2023 when we celebrated our 25th-anniversary editions with bilingual articles and international collaborations.

And so, we have set and accepted this challenge.

Starting this year, we are pleased to announce the adoption of an ahead of print system. This change signifies a commitment to agility and the immediate availability of research in the field of tourism. With the transition to the continuous format, accepted articles—following the same submission and evaluation criteria we have adhered to—will be published online as soon as they are ready. This provides researchers and industry professionals with quick and constant access to the latest scientific contributions. This initiative aims not only to shorten the time between submission and publication but also to enhance the efficient dissemination of knowledge, fostering discussions and significant advancements in our field.

In addition to the shift to the ahead of print system, our journal **reaffirms its commitment to the practice of open science.** We recognize the importance of making research widely accessible, considering it a cornerstone and promoting transparency and collaboration. By renewing our dedication to open science, we provide researchers with the opportunity to share their findings more comprehensively, expanding the impact of their contributions in the field of tourism.

Supported by these two principles, **Turismo: Visão e Ação** begins 2024 with the goal of fostering a more collaborative community and accelerating the pace of innovation. We believe that by choosing our journal to submit their articles, researchers will find a platform that values and facilitates research, providing tangible benefits to the advancement of research in tourism and related areas.

Welcome to Vol. 26 of Tourism: Vision and Action!
